SELECTED PROJECTS

E-Commerce Product API 2026

Python | Django | Django REST Framework | PostgreSQL | Token Authentication | Swagger
<https://github.com/qozeemope/ecommerce>

- Designed and developed a production-ready RESTful e-commerce API using Python, Django, Django REST Framework, and PostgreSQL, following a modular architecture for scalability and maintainability.
- Built secure token-based authentication and full CRUD functionality for users, products, and categories, with automatic product ownership for authenticated users.
- Implemented advanced product search, filtering, and pagination to improve data retrieval and support efficient browsing across large product catalogs.
- Documented and tested the API using Swagger UI, ReDoc, and OpenAPI, enabling clear endpoint exploration and streamlined developer integration.
- Deployed the application to PythonAnywhere with environment-based configuration, ensuring reliable production deployment and live API accessibility.
